OCT 26-NOV 2, 2026 / SCREENSHOT REVIEW

Overnight parking

Patterns to verify, not violations.

Occupied blocks appear to cross midnight in eight of the 23 visible spaces.
S21 and S17 recur most often. Confirm sessions and permissions before taking action.

8 spots	15 spot-nights	S21 / S17
with apparent midnight crossings	candidate observations, not vehicles	repeat-review priorities

Apparent occupancy across midnight

Each column is one night; dates identify the evening and following morning.

SPOT	26 / 27	27 / 28	28 / 29	29 / 30	30 / 31	31 / 01	01 / 02

S18	-	-	-	-	■	-	-
S13	-	-	-	-	-	-	■

Filled square = apparent crossing; dash = not identified in this visual review.

Priority follow-up

S21: five consecutive candidate nights, Oct 26-31. Review recurring authorized use.
S17: four candidate nights, including both weekend nights. Check permissions and sessions.
S18: Friday-to-Saturday block appears to extend from midday into the next morning.
For all eight spots: verify arrival/departure records and camera evidence before escalation.

Method and limits

Visual reading only: occupancy appears on both sides of midnight. This does not establish one continuous stay, the same vehicle, an all-night stay, or unauthorized parking.
Window: Oct 26 10:59 AM-Nov 2 9:59 AM (UI labeled PDT). Boundary days are partial; the Nov 1 DST change requires timezone-aware timestamps. No exact dwell times inferred.
